SKILLS

- HTML/CSS
- Java script
- React
- Tailwind CSS
- Git Control

EDUCATION

BACHELOR IN COMPUTER APPLICATION

Poornima University
PURSUING

SENIOR SECONDARY SCHOOL

National Institute of Open schooling
2022

SECONDARY SCHOOL

Blue Heaven Vidyalaya
2020

EXPERIENCE

Deeporion Technology Pvt.Ltd

Trainee

- Java Script.
- React.js
- Git Control.

PROJECTS

• Spotify Clone

- Developed a front-end clone of Spotify replicating the layout, design, and user interface of the original application.
- Technologies Used :- React.js, tailwind CSS, with Jiosaavan API fetch.

• M2 Connect

- M2 Connect is an innovative and user-centric web application built to enhance the digital music experience by simplifying the song downloading process. The core functionality of the platform revolves around enabling users to download individual songs or multiple songs at once, providing flexibility and efficiency based on user needs.
- The project is primarily designed with modern front-end technologies, namely React and Vite, ensuring high-speed performance, fast loading times, and a seamless user interface. The use of Tailwind CSS allows for a highly responsive, clean, and customizable design, offering a smooth and visually appealing experience across various devices and screen sizes.

• To-Do list

- Built a dynamic To-Do List application featuring task creation, editing, updating, and real-time interaction through a user-friendly interface.
- Technologies Used :- React.js, tailwind CSS .
- store the data in local storage .
